

Casillero del Diablo

RESERVA ESPECIAL

Soils rich in red clay and granite give rise to **Reserva Especial** in Maule, 350 kilometres south of Santiago de Chile. Clay has been a key element in many creations throughout human history, and today it has an important role in making this wine.

The **clay-loam soils** over a granitic base in our vineyards contribute structure and character to this wine, while the zone's coastal breezes and constant sunshine produce the rich acidity and fresh fruit that enables us to obtain a vibrant and enchantingly elegant Cabernet Sauvignon.
