

Casillero del Diablo

RESERVA ESPECIAL

Soils rich in red clay give rise to **Reserva Especial** in the Maule Valley, 300 kilometres south of Santiago de Chile. Clay has been a key element in many creations throughout human history, and today it has an important role in making this wine

The moderately deep **clay soils** give structure and character to this elegant Merlot, while the climate in this area is characterised by its temperature fluctuations, allowing a slow maturing of the grape and maintaining the freshness of the fruit.
